Applicant's Response to the Office Action Dated 5/3/2005

Election/Restrictions

1. In response to the comments in sections 1 and 2 of the Office Action Summary dated 5/3/2005, the applicant acknowledges the election of Species V and the withdrawal of Claims 2-6 & 10.

Actions to Information Disclosure Statement

2. In response to the proper listing of references as pointed out in section 3 of the Office Action Summary dated 5/3/2005, a listing of references is attached herein in a separate paper.

Actions to Drawings

3. In response to the Drawings Objections in sections 4 and 5 of the Office Action Summary dated 5/3/2005, the amended drawings are attached herein. The replacement sheets are attached after the amended specification, and the annotated marked-up drawings follow in an appendix. Fig. 13 for the species V has been moved to Figs. 4 & 5. Fig. 5 is a species V with additional employment of the needle bearings. The ball assemblies in Figs. 8 & 9 have been replaced from the species I to the species V. Figs. 10 through 12 for the species other than V are canceled.

Actions to Specification

4. In response to the Specification Objections in sections 6 and 7 of the Office Action Summary dated 5/3/2005, both the clean and marked-up versions of the substitute specification including abstract are attached herein. The amendment of the specification is mainly for limiting the scope of the invention to the elected species V. In other words, all contents or paragraphs relating to the non-elected species are either struck-out or withdrawn. In addition, some terminologies are rephrased to enhance the readability and to prevent a misunderstanding. For example, the "roller" is replaced by "sub-roller", the "web slot" is replaced by "web groove", and the "lug shaft" is replaced by "slide shaft".

Actions to Claim Objections to Claim 1

5. In response to the Claims Objections in section 8 of the Office Action Summary dated 5/3/2005, the amended claims are attached herein. Since this invention is about a constant velocity joint with new ball assemblies and with a modified ball cage, the claims should clarify the relationships between the
